

MAXIM SOUND SYSTEMS

Bellow is the standard sound speakers for MAXIM SOUND SYSTEMS

In this design 12 inch woofer has been used and a tweeter is 10 inches by 4.5 inches

The dimensions given from page 1 are dimensions for standard **MAXIM** speaker box. You can maintain this standard with all woofer (or Bass speakers) ranging from 2 inches speaker, for maximum quality sound. This is done by calculate the ratio of speaker size in inches to the size of individual dimension of a face and then trigonometry is used for all the other dimension.

As you can see from the pictures above **MAXIM** speakers comes in different sizes and colours. To come up with a well defined and strong box, the boxes are bonded with contact adhesive and covered with rough or fine saw dust and then painted in a desired colour with gross paint. This treatment changes the appearance to plastic like. The following pages will discuss how this is properly done in different ways.

Note that some speakers come with built in amplifiers, which comes in different sizes and types.
